# QUICK SPRAY

Sprayable liquid for teat disinfection before and after milking

## ADVANTAGES

- Powerful disinfectant with LSA<sup>®</sup> complex
- Disinfection of the teat and udder base
- Moisturizing and softening properties
- Adaptated to robot spraying, automatic spraying system and manual spraying

Store in a cool and dry place

PACKAGING:  
10L, 22L, 60L, 220L,  
1000L IBC

## TEAT PROTECTION

QUICK SPRAY is enriched with hydrating and emollient substances bringing exceptional skin conditioning virtues.

## TEAT DISINFECTION

QUICK SPRAY is a disinfectant based on LSA<sup>®</sup> (hydroxy acid complex). QUICK SPRAY is bactericidal according to EN 1656 on *Escherichia coli*, *Staphylococcus aureus*, *Streptococcus* and yeasticidal on *Candida albicans* according to EN 1657 in 1 minute before milking and in 5 minutes after milking.

## DIRECTION FOR USE

- Ready to use before and after milking.
- Before milking, apply QUICK SPRAY by spraying on the teat, let it act at least one minute, and wipe with a paper of single use or with a clean cloth.
- After milking, apply QUICK SPRAY by spraying. Leave the product until next milking. Keep the cows standing until the product has dried (at least 5 minutes).

## MAIN COMPONENTS

Active(s) substance(s) per 100g of product: acid L - (+) - lactic 2g + salicylic acid 0.099g

Other components: moisturizing and softening agents, surfactants
